Stirling Properties named facilities manager of LOOP

Stirling Properties has been named facilities manager of the 40,000 square foot LOOP Building located in the Northpark complex in Covington.

Stirling Properties will oversee and coordinate the safe, secure, and environmentally sound operations and maintenance of LOOP, LLC's asset in a cost effec-

tive manner aimed at long-term preservation of the asset value.

"LOOP moved their corporate offices to the Northshore of New Orleans in order to insure business continuity during storms, a lesson well learned during Hurricanes Katrina and Rita," said Donna Taylor, Senior Vice President of

Asset Management & New Business Development at Stirling Properties. "Their operations are a significant part of not only our local but national economy and LOOP remaining in business during times of natural disasters is of utmost importance. Stirling was chosen to manage their facility due to our knowl-

edge and experience in not only major multi-tenant office buildings but also in serving the unique needs of LOOP, as with most single tenant building owners."

For more information about the property or facility management services, contact Taylor at 898-2022 or by e-mail dtay@stirling-prop.com.
